YOUSEF HAMED Mohamed

Communications & Computers Engineering Student | Front End Engineer

Mansoura, Egypt | +20 106 998 4009 | yousefelgamily72@gmail.com
github.com/youssef-hamed04 | yousef-hamed-portfolio.vercel.app

PROFILE

Communications and Computers Engineering student at Mansoura University with proven management experience leading a training center's daily operations, alongside hands-on training in Artificial Intelligence and Frontend Development (React). Combines technical skills with strong leadership, organization, and people-management abilities gained through real management roles. Designs apps in Figma and builds them with React, Next.js, and React Native.

PROFESSIONAL EXPERIENCE

Programming Instructor — IC Robotics *Sep 2026 – Present*

- Teach programming to children aged 4 to 17.
- Subjects taught: Python, web development, UI/UX, WeDo 2.0, LEGO SPIKE, Canva, Scratch, and PictoBlox.

Manager — On Air Marketing Agency *Jul 2026 – Sep 2026*

- Oversaw agency operations and coordinated day-to-day management tasks.

HR & Center Manager — Total Center *2024 – Jul 2026*

- Managed all daily operations of the center, including class schedules and logistics.
- Coordinated with instructors and handled communication on behalf of the center.
- Calculated and managed instructors' commission and revenue share.

Data Entry Specialist — Total Center *2023 – 2024*

- Handled data entry operations for a high school center.
- Organized and maintained codes, records, and sheets for accuracy and easy retrieval.
- Tracked and updated students' requirements and administrative documentation.

PROJECTS

Student App — University Learning Platform *student-web-gray.vercel.app*

- Built as three clients on one NestJS API: a student mobile app, a student web app, and an admin & teacher dashboard.
- Mobile (Expo, React Native, TypeScript): light and dark themes, full English and Arabic with real RTL, HLS video through short-lived playback tickets, and a custom native module that blocks screen capture on Android and iOS.
- Web (Next.js 15, React 19, TanStack Query): a server-side proxy keeps tokens in HTTP-only cookies.
- Dashboard (Next.js, Tailwind, react-hook-form, zod): courses, students, teachers, access codes, support, notifications, and logs for staff, with every permission re-checked by the API.

Cartify — Graduation Project

- Full-stack store with a smart return locker: a return request gets a daily 4-digit code, and the Arduino locker works out the same code offline with SHA-256.
- Guest carts merge into the account at sign-in, and an Expo app runs on the same API.
- Stack: Node.js, Express, MongoDB, JavaScript, Arduino, React Native.

Ghar Sheet — Machine Learning, ITI Final Project *ghar-sheet.vercel.app*

- Estimates the price of a flat anywhere in 50+ Indian cities.
- Cleaned a 187K-row Kaggle dataset, trained a scikit-learn model on it, served it with FastAPI, and built the React form that asks for the listing's details.
- Stack: Python, scikit-learn, FastAPI, React, Docker.

React E-commerce Store — T-Square Final Project *react-final-ecommerce-projectt-squa.vercel.app*

- Multi-page shopping front end in React, built as the capstone of the front-end training and deployed on Vercel.
- Stack: React, JavaScript, CSS.

Ahmed Mokhtar Portfolio — Website *ahmed-mokhtar-portfolio.vercel.app*

Shifaa — Health App UI/UX in Figma, Arabic RTL

- Patients find and filter doctors, book an appointment, upload a prescription for the pharmacy, pay, and track the delivery.
- 22 finished screens, built on a sitemap, a style guide, and a component library.

TastyGo — Food Delivery App UI/UX in Figma

- Browse restaurants by category, open a menu, choose a dish's size and extras, check out in three steps, then follow the rider on a live map.

Smaller Builds

- React Cart: shopping cart in React, live at react-cart-alpha-tan.vercel.app.
- On GitHub: Dollar to EGP currency converter, sign-in form with client-side validation, and a small Flappy Bird game in C#.

TRAINING & DEVELOPMENT

AI and Machine Learning Foundations — Information Technology Institute (ITI) *2026*

- Completed a 90-hour program: Python and NumPy, probability and statistics, linear algebra and optimization, data preparation, machine learning, and neural networks.
- Final project: Ghar Sheet (see Projects).

Frontend Development Training — T-Square 2025-2026

- Trained in frontend web development up to the React framework.
- Built several frontend projects using HTML, CSS, JavaScript, and React (see GitHub).

AI Trainee — Zewail City *2023*

- Completed an intensive program in Introduction to Artificial Intelligence and its Applications.
- Covered: Python programming, Machine Learning, Deep Learning, and Reinforcement Learning.
- Explored Embedded Systems in AI, Big Data Analytics, Time Series Analysis, and Data Science / Clustering.
- Studied Logic in AI, Vulnerability Analysis, and AI applications in Healthcare and Engineering.
- Discussed the future of AI with a focus on ethical considerations.

EDUCATION

Bachelor of Communications and Computers Engineering — Mansoura University — Faculty of Engineering, CCE Department *Oct 2022 – Jan 2027 (Expected)*

Cumulative GPA: 3.6

CERTIFICATIONS

- AI and Machine Learning Foundations, 90 Hours — Information Technology Institute (ITI) — Sep 2026
- Introduction to Game Analysis, 30 Hours in Metrica — Beltagy Football Analysis Services — Aug 2026
- Front-End Developer Course — T-Square Training Center — Jun 2026
- Build with AI — Masr Edition — Certificate of Attendance (virtual training sessions)
- Graphic Design Diploma, 50 Hours — Photoshop, Illustrator & InDesign — Grand Notion Training Center

SKILLS

Team & Center Management • Frontend Development (React) • Next.js • React Native • TypeScript • Python • scikit-learn • UI/UX • Figma • Scratch • PictoBlox • WeDo 2.0 • LEGO SPIKE • Project Management • Logo Design • Presentation Design • Digital Design • Photoshop • Illustrator • InDesign • Canva • Creativity • Critical Thinking

LANGUAGES

Arabic — Native • English — Good • German — Basic
